What's inside matters:

Understanding Each Pristene® Ingredient

Omega-3 Algal Oil

- Omega-3s are vital to support a healthy tear film
- Certified Vegan - The omega-3s in Pristene® are from algal oil which is free of contaminants like mercury and PCBs that are often found in common fish oil
- Pristene® contains both essential forms of omega-3 fatty acids -- DHA and EPA, which are essential for eye health
- Contains the natural triglyceride form of omega-3s for increased bioavailability and effectiveness in the body
- Pristene® uses environmentally friendly algal oil and contains no fish

Maqui berry

- Maqui berry is a South American berry high in antioxidants, known as delphinidins, and beneficial for overall eye health
- Clinically shown to help support tear production

Vitamin E Succinate

- Natural antioxidant sourced from soybean oil
- Helps prevent polyunsaturated fatty acids from becoming oxidized and spoiling

Supplement Facts

Serving Size 2 softgels
 Servings Per Container 30

	Amount Per Serving	% Daily Value
Calories	15	
Calories from Fat	10	
Total Fat	1.5 g	2%*
Total Carbohydrate	< 1 g	< 1%*
Cholesterol	< 5 mg	1%
Sodium	10 mg	< 1%
Vitamin E (as d-Alpha Tocopherol)	10 IU	33%
Algal Oil (<i>Schizochytrium sp.</i>)**	1.4 g	†
Total Omega-3 Fatty Acids**	700 mg	†
EPA (Eicosapentaenoic Acid)**	210 mg	†
DHA (Docosahexaenoic Acid)**	420 mg	†
MaquiBright® (<i>Aristotelia chilensis</i>) berry standardized extract	60 mg	†

*Percent Daily Values are based on a 2,000 calorie diet.
 †Daily Value not established.

Other Ingredients: Vegetarian capsule (modified food starch, carrageenan, glycerin, sorbitol, purified water, sodium copper chlorophyllin), candelilla wax, sunflower lecithin and strawberry flavor.

PRISTENE®

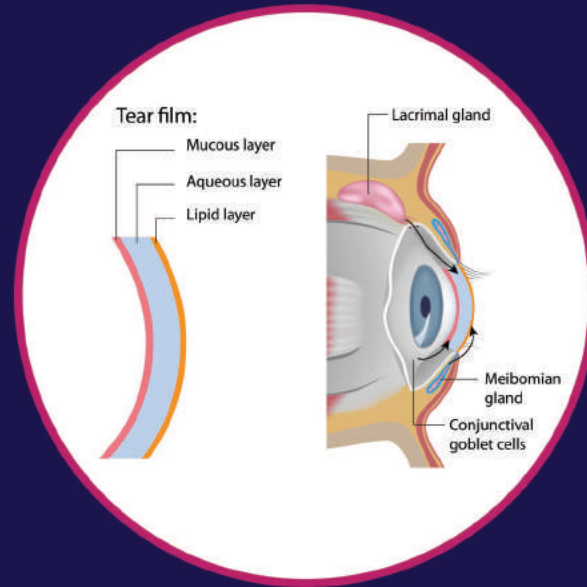

Scientifically formulated to support healthy tear production

VEGAN OMEGA-3 SUPPLEMENT FOR NATURAL EYE HEALTH

Are your eyes getting the **nourishment** they need?

Healthy eyes are lubricated with an even layer of tears that serves as a protective film, called the tear film, to help to protect the cornea, which is the front surface of the eye. A healthy tear film consists of the right mix of oils, water, proteins, and mucus. Healthy tears and a healthy tear film are critical for support of the surface of the eye.

Omega-3s are needed for healthy tears and optimal eye health, and also for exceptional overall health. Omega-3s are not produced by our body and must be obtained by diet or supplementation.

The Importance of Omega-3 Fatty Acids For Healthy Tears

Omega-3 fatty acids can help support the eye's tear film, by supporting the small glands on the edge of the eyelid, called the meibomian glands which help make the oil for the tear film.

- Dietary modifications with omega-3 fatty acids should be part of the first step for healthy tear support
- Most Americans don't get enough omega-3 fatty acids, according to a study of the U.S. National Health and Nutrition Examination Survey, 2003–2008

Introducing **Pristene®** for healthy tear production

Nourish your eyes

Pristene® is based on multiple clinical trials and formulated by leading eye care professionals.

Each ingredient has been meticulously selected by physicians and combined in a proprietary formulation providing the optimal support for your eyes.

Pristene® is manufactured in an FDA inspected cGMP facility and undergoes rigorous testing for quality assurance.

- 2 softgels per day or as recommended by your eye care provider
- Premium sourced ingredients clinically shown to support healthy tear production
- Certified Vegan, gluten-free, and non-GMO
- Natural Strawberry Flavor
